Summary

Associate Consultant specializing in PL/SQL development and backend engineering at Oracle Financial Services Software, with hands-on experience in building, optimizing, and deploying financial solutions. Experienced in enhancing banking systems like FLEXCUBE and integrating transactional workflows to support critical operations.

Skilled in Java, Spring Boot, and SQL, with a strong grasp of system architecture and client-specific customization. Adept at collaborating with cross-functional teams, resolving production issues, and delivering high-quality software in fast-paced environments. Passionate about continuous improvement, scalable engineering, and bridging technology with impactful financial services.

Education

Bachelor of Technology, DIT University – Dehradun, India   Jan 2023

High School Diploma, Sehwag International School – Jhajjar   Jan 2019

Experience

Associate Consultant, Oracle Financial Services Software – Bengaluru, India   Aug 2023 – Present

- Worked as a backend developer using Java, PL/SQL, and REST Services in core banking projects.
- Contributed to the **RABO-BANK-BRAZIL** project by implementing custom modules for agricultural banking solutions.
- Designed and developed transactional logic and backend flows for split-disbursement and settlement processes.
- Integrated JD SPB message flow for debenture disbursement using API-based solutions within the FLEXCUBE system.
- Developed and optimized PL/SQL procedures for settlement message generation in OLTP systems.
- Collaborated directly with clients to gather requirements and deliver customized, scalable solutions.
- Conducted system-level testing to validate and ensure the reliability of newly developed features.

Skills

Programming: Java, PL/SQL, SQL, HTML, XML

Frameworks & Tools: Spring Boot, REST APIs, Git, GitHub, FastAPI,

Databases: OracleDb, MySQL

Operating Systems: Linux

Other: Software testing, Problem solving, Version control, Team collaboration

Projects

Job Application Tracker   link

- Full-stack web application to manage job applications with log-in, tracking, and resume upload.
- Backend built with Spring Boot, authentication via JWT and Spring Security.
- Integrated AI resume parser using FastAPI microservices.
- UI designed using Tailwind CSS and Framer Motion.

Academic Projects

Travel Planner App (Java)   Group Project

- Android app for comparing flights, hotels, and rentals.

- Developed using Java/Kotlin in Android Studio.

Other Academic Projects <div style="float:right">Mini Projects</div>

- **Weather App (Java)** – Real-time weather updates using public JSON APIs.
- **Tic-Tac-Toe (Kotlin)** – Interactive two-player mobile game with a modern user interface.
- **News App (Java)** – Headlines and images obtained using Retrofit and Glide.

Certifications

- CCA: JAVA LEVEL-2 (Jan 2021)
- CCA: JAVA LEVEL-1 (Nov 2020)
